Professional Summary

Full Stack Developer with over 5 years of experience building secure, scalable web applications and data platforms using Angular, .NET, PHP and SQL. Skilled in translating complex business requirements into intuitive, user-focused solutions; experienced across architecture, API design, cloud deployment, data processing and visualization. Holds a Master's in Data Science and Analytics and consistently delivers measurable impact across public and private sector projects.

Technical Skills

Programming Languages: C#, Java, SQL, Python, PHP, R

Web Frameworks & APIs: Angular, .NET, Node.js, HTML, CSS, Bootstrap CSS, Tailwind CSS, jQuery, JSON, REST API

Databases & Storage: MS SQL Server, Oracle, MySQL, PostgreSQL, MariaDB; basic knowledge of NoSQL (MongoDB)

Cloud Platforms & DevOps: Microsoft Azure, cPanel, XAMPP, Linux, Windows Server, Docker

Tools, IDEs & Collaboration: Git, GitHub, Azure DevOps, Agile/Scrum, Visual Studio, Visual Studio Code, NetBeans, Eclipse, Microsoft Office Suite, Postman, Swagger

Data & Analytics Tools: Power BI, Tableau, ArcGIS JS API, Jupyter Notebook, data visualization; basic machine learning with scikit-learn and PyTorch

Professional Experience

Full Stack Developer | University of Oklahoma

January 2023 – Present

- Built and launched the Oklahoma Housing Needs Assessment platform using Angular, PHP and MySQL, giving policymakers and planners easy access to Census and HUD data.
- Built a Python ETL pipeline with idempotent runs, logging, schema validation, and data-quality checks that reduced the annual data refresh time by 80 % and improved data quality.
- Designed secure, scalable APIs with layered architecture, parameterized queries, and efficient filtering for large datasets.
- Built forecasting models for key variables such as population, income and employment to guide planning.
- Integrated interactive maps with layers, clustering and tooltips via the ArcGIS JS API and optimized performance with server-side filtering and geometry simplification.
- Optimized SQL queries and created stored procedures to improve database performance; used cron jobs to automate routine tasks and keep the system running smoothly.

Application Developer | Cognizant Technology Solutions, Hyderabad, India

January 2021 – December 2022

- Built an Angular single-page application with reusable components, route guards and MSAL-based OpenID Connect authentication, making the front end easy to maintain and ensuring secure user access.
- Developed backend REST APIs using both .NET and Python on Azure App Service, setting up CI/CD pipelines and Application Insights monitoring to ensure reliable operation and real-time performance insights.
- Created an ETL pipeline using blob-triggered Azure Functions and Logic Apps to ingest Excel data from Azure Storage and load it into a relational database for reporting and analysis, reducing manual effort and errors.
- Implemented Azure API Management to front APIs and functions, adding JWT validation, rate limiting and versioning to secure and govern integrations.
- Improved reliability and security by implementing structured logging, managing secrets in Azure Key Vault and enforcing least-privilege access using Managed Identity.

.NET Developer | Purple Technologies, Vijayawada, India

May 2019 – September 2020

- Designed and built a college automation portal using .NET, Entity Framework Core and SQL Server to digitize admissions, attendance, grading and fee tracking, reducing manual work and improving efficiency.
- Led the project from requirements workshops and user stories through system architecture, development, testing and production deployment, ensuring smooth end-to-end delivery.
- Facilitated biweekly sessions with students, faculty and management to validate requirements and iterate on improvements, keeping the portal aligned with user needs.
- Implemented role-based authentication and authorization for administrators, faculty and students, with server-side validation, centralized error handling and a responsive Bootstrap-based UI.
- Deployed and maintained the portal on Windows Server with IIS, managing environment-specific configuration, backups, logging, monitoring and Git-based change management.

Education

Master of Science in Data Science & Analytics

University of Oklahoma, Norman, Dec 2024

GPA 3.9 / 4.0

Bachelor of Science in Computer Science & Engineering

Dhanekula Institute of Engineering & Technology, Vijayawada, Nov 2020

GPA 8.17 / 10.0
